PROJECTS

10/2024 – 11/2024
Simple Interest Calculator

This application is built with REACT and it helps you to calculate your simple interest and displays it.

11/2024 – 12/2024
Media Player

This Media Player Application is made using React JS and Json-Server. It helps you to add, view, and categorize your favorite videos or songs. The categorization is implemented using drag and drop feature. This app also maintains a watch history that could also be managed by the user. With this project I learned the concept of state lifting, creating APIs and making API calls as well as creating and configuring a server

10/12/2024 – 18/12/2024
Ecart

This Ecart application helps you to view products, add/remove products to/from wishList or Cart. From the Cart the user could place the order. This project helped me to understand the concept of REACT Redux.
